Oct 8, 2026 · @Nonso

Objective

Seeking a remote frontend development internship where I can contribute to real-world projects, grow through hands-on experience, and demonstrate my value with the goal of transitioning into a full-time position.

Skills

Core: HTML5, CSS3, JavaScript (ES6+), React

Tooling: Vite, React Router, Git & GitHub, npm

Also comfortable with: REST APIs, localStorage/sessionStorage

---

Projects

CosmoRemit — Fintech Web App

React, React Router, JSON Server, JavaScript

- Built a remittance and money-transfer platform with multi-step transfer modals, transaction history, and beneficiary management
- Wired the frontend to a live REST API (JSON Server) deployed separately on Render
- Live: fintech-cosmo.netlify.app · Code: github.com/FinTechWeb/FinTech

Coffee Shop Landing Page — Marketing Site

HTML, CSS, JavaScript

- Built a landing page for a coffee shop focused on conveying atmosphere and quality
- Deployed as a static site on Netlify
- Live: candid-dieffenbachia-9618b8.netlify.app

Area — Product Launch Landing Page

React, Vite, CSS

- Built a model product-launch page component by component (navigation, header, sections, footer)
- Implemented a mobile-first responsive layout with a hamburger menu at mobile/tablet widths
- Live: area-landing-page.netlify.app · Code: github.com/Nonilee/area-LandingPage

---

Education & Certification

Full Stack Web Development (Front End) — New Horizons Completed May 2026 · Certificate No. NHN75963
